**DETAILED ACTION**

***Allowable Subject Matter***

1. Claims 11 – 24 are allowed.
2. The prior art does not disclose replacing a displaying image segment at individual partition with new image segment assigned to the same partition in the following page, when the internal music time reaches individual music time value assigned for the new image segment.

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claim 25 is rejected under 35 U.S.C. 102(e) as being anticipated by Sitrick (7,098,392). Sitrick discloses the use of a mark (i.e., a bookmark; see paragraph bridging cols. 35 and 36, also see first paragraph col. 36), and adjusting point data (i.e., navigational protocol; see paragraph beginning at line 41 of col. 35) for music display

(Sitrick states "...bookmark data is associated with a location on the music notation along with the next logically associated transition (i.e., a repeat) and loaded into the cache and prepared for display." See col. 37, lines 30 - 33; Applicant's staff is synonymous with Sitrick's musical notation). It is also noted that the user of the Sitrick invention can input bookmarks throughout the score (see paragraph bridging cols. 35 and 36). Applicant's "adjusting" is synonymous with "navigating." Finally, when Sitrick navigates to a new location (i.e., to the beginning of a repeat), this is synonymous with "adjusting internal music time."

### ***Conclusion***

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
